10 October 1969

MEMORANDUM FOR THE RECORD

SUBJECT: Investigation-Viewing Systems Study

1. During the afternoon of Monday, 6 October 1969, the Project Officer visited [redacted] [redacted] for the purpose of investigating the feasibility of conducting a Viewing Systems Study. This proposed study is a NPIC FY-70 Research and Development Project.

2. The Project Officer presented the basic idea behind the proposed study (see the Introduction paragraph of the Design Objectives), and asked [redacted] to comment on the possibility of conducting such a project.

3. [redacted] stated that such a study would be possible but warned that it should be kept in a very generalized form, i.e., not restricted to procedures or costs peculiar to any one company. He went on to say that, depending on the extent to which the study was carried, the collected data would appear to be ideally suited to computer storage. This, he said, would allow efficient updating at periodic intervals. He also acknowledged that such a study should be conducted by an optical manufacturing firm rather than a university or consulting firm.
